FORT LAUDERDALE
POLICE DEPARTMENT TO
LAUNCH BODY WORN
CAMERA PILOT PROGRAM

Update: 11.30.17

The Fort Lauderdale Police Department has started the training phase of the Body Worn Camera Pilot program.

This week Axon Incorporated introduced their camera system and provided training to the officers who will be outfitted with their devices.

Motorola Incorporated will be providing training on their product next week.

Once all of the training has been completed by both vendors the officers will begin their patrol duties outfitted with the cameras.

Original: 11.13.17

The Fort Lauderdale Police Department has been proactive in developing a Body Worn Camera (BWC) program. The program is a result of our Department's continuous efforts to enhance transparency and accountability and to improve police services in the City of Fort Lauderdale. As described in the President's Task Force on 21st Century

Policing report, our Department recognizes the importance of implementing initiatives that aid in building community trust and reinforce constitutional policing.

In partnership with the Fraternal Order of Police (FOP Lodge #31), our Department sought input from our elected officials as well as our neighbors and stakeholders while developing the policy for the body worn camera pilot program.

Axon Incorporated (also referred to as Taser) and Motorola Incorporated were selected as the two vendors that officers will be evaluating in the field, during the pilot program, which will last 12 months.

Over 50 police officers have volunteered to participate in the pilot program; and 35 have been scheduled to be issued the devices for evaluation. Officers are set to receive training conducted by both vendors between November 27th and December 8th, after which time they will begin their patrol duties outfitted with the cameras.
